

CUSTOM-MADE PRODUCTS - DEVELOPMENT AND PRODUCTION

ADHESIVE TAPE APPLICATORS

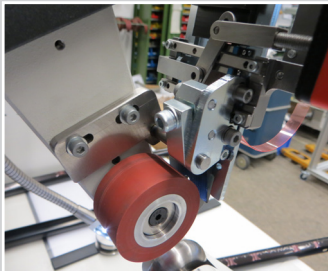

Developed to apply double-sided adhesive tape to plastic strips.
For the automotive sector.

SPECIAL FEATURES:

- The carrier strip remains untouched and is only pulled off during fitting. This enables prefixing of the parts on the carrier material
- Adhering to plastic strips using two powered rollers
- The roller pressure is adjustable

THE MACHINE CONSISTS OF THE FOLLOWING:

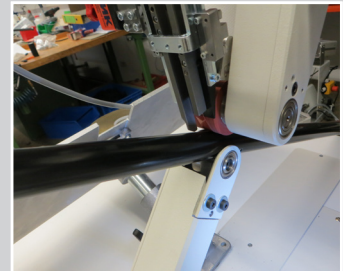

- Machine body is post-bed design
- Caster frame with height adjustment
- Upper and lower transport roller
- Servomotor drive for continuous feed. Speed controlled through foot pedal
- Reproducible tape guidance, adjustable from 5-20 mm -42058-
- Tape roll holder with tape brake
- Adjustable fabric edge stop with roller
- Straight fabric edge stop
- Inclined fabric edge stop for inner radii
